The United States Bankruptcy Court for the Northern District of Oklahoma is located in the Federal Building in Tulsa.
The Clerk's Office serves two Judges and employs 24 employees in the administration of bankruptcy cases. The Court
has recently converted to a new case administration system which allows electronic filing of documents over the internet.
 The position of Solaris System Administrator will work directly toward the improvement of the case administration
system for all users.

Position Overview: The incumbent is responsible for installing, configuring and maintaining a Solaris operating system to be
used in the development of the court's case management system - CM/ECF. This position reports to the Chief Deputy
Clerk but will take assignments from and work closely with the IT System Administrator who manages the Solaris OS on the
live system.   The incumbent will work on modifications to the CM/ECF system on the development box. Incumbent will be
required to document all changes to the system.

Requirements: Candidates must possess a minimum of one year experience managing a Solaris OS including the installation
and configuration of a new system. The successful candidate will have demonstrated technical knowledge and expertise in
the use of PERL in web development. One year of PERL experience is required. Preference will be given to candidates
with experience in dynamic generation of HTML web pages using PERL scripting language; object oriented PERL; and
development of extensive web-based systems employing PERL.

Preferred Qualifications: SQL – Experience writing and debugging complex queries for accuracy and performance.
Sound knowledge of relational database concepts. Informix – Familiarity with Informix RDBMS tools and environment.
Administration of Informix database. Solaris – OS administration on the x86 platform.

How to Apply: To ensure consideration, please submit resume and cover letter by close of business on April 23, 2004 to:
